

CITY OF BENTON CITY STANDARD DRAWINGS

TABLE OF CONTENTS

ITEM

	PAGE
1. STANDARDS	
Not Used	1-1 – 1-2
Typical City Utility Locations for New Street Construction.....	1-3
2. STREET DETAILS	
Residential Neighborhood Street, Cul-de-sac, Turn Around	(4 sheets) 2-1
3-Lane / Collector Street.....	(2 sheets) 2-2
3 and 4-Lane / Major Collector Street	(2 sheets) 2-3
Minor Arterial Street.....	(2 sheets) 2-4
Principal Arterial Street.....	(2 sheets) 2-5
Trench Pavement Restoration Detail.....	2-6
Bituminous Surface Treatment Detail	2-7
Survey Monument	2-8
Concrete Valley Gutter Detail	2-9
Curb, Gutter, Sidewalk & Driveway	(2 sheets) 2-10
Extruded and Type E-1 Curbing	2-11
Pedestrian Access Ramps.....	(6 sheets) 2-12
Construction – Commercial Concrete Mixes	2-13
Sidewalk HMA Ramp.....	2-14
Dropped Back Sidewalk Detail	2-15
Modified Retaining Wall Design	2-16

3. SANITARY SEWER DETAILS

Sewer Cleanout Detail – 6” and 8”	3-1
Standard Manhole Details	(2 sheets) 3-2
Manhole Frame and Cover	3-3
Manhole, Valve and Cleanout Adjustments	3-4
Drop Connections	(2 sheets) 3-5
Sewer Service Installation Requirements	3-6
Typical Sanitary Sewer Service Backflow Requirement	3-7
Grease Interceptor.....	3-8

4. WATER DETAILS

2-inch Blow-Off Assemblies	(2 sheets) 4-1
Water Stub Requirements for Future Extension	4-2
Transmission Line Blow-Off Assembly	4-3
Typical Fire Hydrant Installation	(2 sheets) 4-4
Details for Tapping Water Mains	4-5
Thrust Block & Mechanical Restraint.....	(2 sheets) 4-6
Imported Pipe Bedding for Sanitary Sewers, Storm and Water Mains	4-7
Air and Vacuum Assembly	4-8
Tracer Wire Installation and Valve Stem Extension Detail	4-9
Water Truck with Air Gap	4-10
PVBA Installation.....	4-11
Pipe Supports.....	4-12
DCVA Installation $\frac{3}{4}''$ - 1”	4-13
DCVA Installation $1\frac{1}{4}''$ – $2\frac{1}{2}''$	4-14
DCVA Installation 3”+ In Building.....	4-15

DCVA Dual Installation 3"+ In Building	4-16
DCVA Dual Stacked 3"+ In Building.....	4-17
DCVA Dual Parallel 3"+.....	4-18
DCVA Installation 3"+.....	4-19
RPBA Installations $\frac{3}{4}$ " – 1"	(2 sheets) 4-20
RPBA Installations 1 $\frac{1}{4}$ " – 2"	4-21
RPBA Installations 2 $\frac{1}{2}$ "+	4-22
RPBA Dual Parallel or 3"+.....	4-23
RPBA Dual Stacked.....	4-24
Fire Line Into Building	4-25
1-inch Single Water Service – (PVC Main)	(2 sheets) 4-26
Double Water Service – (PVC Main)	4-27
1-inch Single Water Service – (DI, Steel, AC Main)	4-28
1-inch Double Water Service – (DI, Steel, AC Main)	4-29
2-inch Water Service.....	4-30
Water Meter Installation	4-31
3-inch or Larger Water Meter Vault Installation	4-32
Casing Spacer Detail.....	4-33

5. STORM SEWER DETAILS

Catch Basin.....	5-1
Catch Basin Frame and Cover	5-2
Dry Well Percolation Report	5-3
Modified Dry Well Detail	5-4
Dry Well Detail Standard.....	5-5
Sanitary Sewer Service Backflow Requirements.....	5-6

6. STREET LIGHTING DETAILS

Street Light Standard	6-1
Typical Induction Luminaire.....	6-2
Not Used	6-3
Typical Light Circuit	6-4
Fused Safety Disconnect	6-5
Street Cut and Patch Detail for Typical Traffic Signal, Street Lighting and Utility Company, Conduits	6-6
Street Light Conduit Location	6-7
Street Light Junction Box Installation	6-8
Terminal Cabinet Pole Stand Off Bracket	6-9

7. Traffic Details

Typical Sign Post Detail	7-1
Street Name Sign	(2 sheets) 7-2
Typical Sign Installation.....	7-3
End of Roadway Signage (W 16-1).....	7-4
No Parking Fire Lane Sign.....	7-5
Pavement & Tubular Marker Installation	7-6
Mast Arm Street Name Signs	(3 Sheets) 7-7
Alternate Controller Cabinet & Service Box Placement	7-8
Preformed Conduit Encased Vehicle Detector Loop Detail	7-9
Street Intersection Widening.....	7-10
Traffic Circle	(2 sheets) 7-11
Speed Hump.....	7-12
Required Sign	7-13
Shoulder Work (Any Road)	7-14

Typical Lane Closure (2-Lane Road)	7-15
Typical Right Lane Closure (4-Lane Road).....	7-16
Typical Left Lane Closure (4-Lane Road)	7-17
Typical Double Lane Closure Outside (4-Lane Road)	7-18
Typical Double Lane Closure Inside (4-Lane Road)	7-19
Typical 2-Lane Closure (4-Lane Road).....	7-20
Typical 2-Lane Closure Inside (5-Lane Road)	7-21
Typical 2-Lane Closure Outside (5-Lane Road)	7-22
Typical 3-Lane Closure Outside (5-Lane Road)	7-23
Inside Lane Closure Near Side of Intersection	7-24
Inside Lane Closure Far Side of Intersection.....	7-25
Example of Work Near Intersection.....	7-26
Example Road Closure and Detour	7-27
Typical 1-Lane Closure, One Side 3-Lane Road	7-28
Typical Lane Closure, 2-Lane Road, Two-Way Traffic	7-29

8. IRRIGATION DETAILS

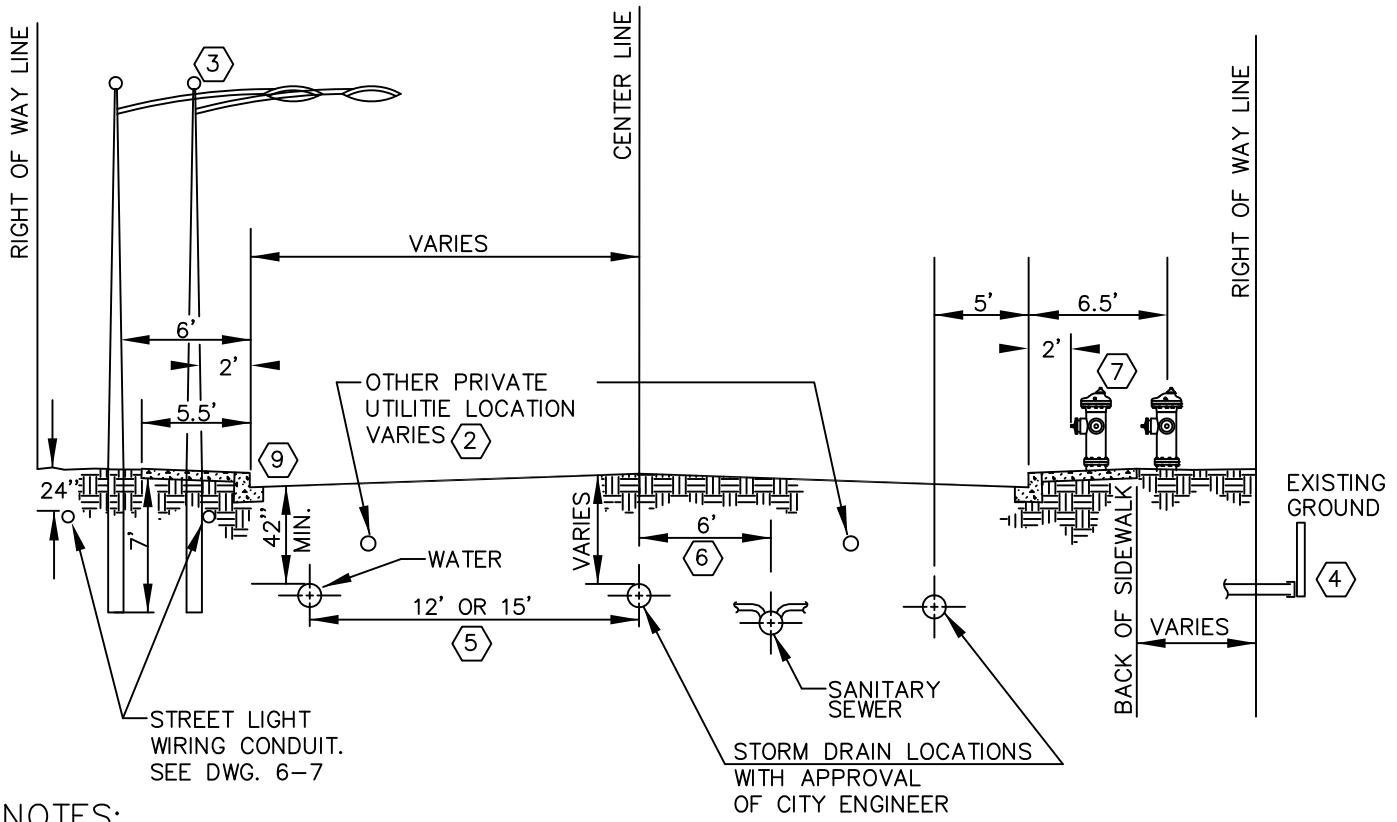

Electrical Irrigation Valve Detail.....	8-1
Swing Joint Riser Assembly	8-2
Lateral Line and Bubbler Heads	8-3
Irrigation Pipes Within City Right-of-Way or Easements	8-4

9. Landscaping Details

Coniferous Tree Guying	9-1
Deciduous Tree Staking.....	9-2

10. PARK AND TRAIL DEVELOPMENT DETAILS

Half Court Basketball	10-1
Full Court Basketball	10-2
Picnic Table with Concrete Pad.....	10-3
Picnic Table with Concrete Pad and Approach	10-4
Trail or Sidewalk Widening for Bench Installation.....	10-5
Trail or Sidewalk Widening for Trash Receptacle Installation	10-6

NOTES:

- ① Developer or Contractor is required to call 1-800-424-5555 a minimum of 48 hours prior to digging within the limits of City right-of-way for the location marking of all underground utilities.
- ② Typical locations for other proposed or existing public utilities shall be verified by the Developer or Contractor. A minimum horizontal separation of 3 foot shall be maintained from city water mains for utilities except that a minimum 5 foot separation is required for irrigation. A minimum 5 foot horizontal separation shall be maintained from City sewer and storm sewer mains.
- ③ Street light poles typically will be installed on alternating sides of the street and spaced as indicated on Standard Drawing No. 6-2. When the sidewalk is separated by a planter strip, place face of pole 2 feet from face of curb.
- ④ Water meter boxes will be installed at the back of sidewalks, except that when sidewalks are separated by a planter strip, set AMS at 2 feet from face of curb. Stub water and sewer services to R/W or home side of sidewalk, whichever is greater, cap and mark.
- ⑤ Potable water lines typically shall be installed 12 feet from and parallel to the centerline of the right-of-way on the north or west side of 36' wide street. The water line shall be 15 feet from and parallel to centerline of the right-of-way on the north or west side on 38' or wider streets.
- ⑥ Sanitary sewer line typically shall be installed 6 feet from and parallel to the centerline of the right-of-way on the south or east side.
- ⑦ Fire hydrants typically will be installed on alternating sides of the street on 300 foot spacing in industrial and commercial areas and on 600 foot spacing in residential areas. When sidewalks are separated by a planter strip, set hydrant port at 2' from face of curb.
- ⑧ Gas, power, telephone and other utilities shall maintain a minimum 3 foot horizontal clearance from City water lines, and 5 foot horizontal clearance from City sewer lines.
- ⑨ If conflicts require alternate water or sewer main locations, approval shall be obtained from the City Engineer for the location. A minimum 3 foot separation from the face of curb is required.
